

Topo Map Indexes

Indexes for our topographic maps are filed in the map drawers on the lower level. To find an index map:

- Go to the first map drawer for the state or U.S. area and scale that you are looking for.
- There is another set of topo indexes in a file at the Reference Desk on the first floor. The reference Desk also has a book that includes the 15-minute quadrangle coverage.
- We are working on approaches to provide better index help at the map cases.
